

MUHAMMAD ALI SUBEH

Senior Project Engineer

+974-77791919 m.a.subeh@hotmail.com Doha, Qatar 04 Sep 1991 Palestinian/German

SUMMARY

UPDA Grade A-certified Senior Project Engineer with over 9 years of experience delivering civil infrastructure, railway, and large-scale construction projects across Qatar and Germany. Holds dual master's degrees in Railway Systems Engineering and Construction Project Management. Experienced in project execution, site supervision, contractor coordination, cost control, procurement, technical inspections, and railway works delivered in accordance with Deutsche Bahn standards. Combines strong technical knowledge with commercial awareness and a proven ability to coordinate multidisciplinary teams, manage project requirements, and support timely, quality-driven delivery.

EXPERIENCE

Senior Project Engineer

HATCO for Trading & Contracting

07/2026 - Present Doha, Qatar

- Lead civil construction activities for datacenter projects, ensuring alignment with approved drawings, technical specifications, quality requirements, and project milestones.
- Direct site engineers, subcontractors, and construction teams while monitoring progress, productivity, safety compliance, and resource utilization.
- Coordinate with consultants, clients, suppliers, and multidisciplinary teams to resolve technical issues and maintain uninterrupted project execution.
- Oversee inspections, material approvals, technical submittals, method statements, and closure of consultant comments and non-conformance items.
- Monitor project risks, construction priorities, and site constraints, implementing corrective actions to protect schedule, quality, and delivery targets.
- Prepare and review progress reports, technical documentation, and management updates to support informed decision-making and successful project delivery.

Junior Rail Construction Manager

STRABAG Rail GmbH

04/2024 - 01/2026 Germany

- Led engineering, procurement, and commercial activities for railway projects per Deutsche Bahn standards.
- Managed day-to-day coordination of subcontractors, suppliers, and site teams, monitoring performance against safety, quality, technical, and programme requirements.
- Coordinated multiple railway work packages, including technical documentation, material planning, progress reporting, and interface management.
- Conducted site inspections and technical verifications, identifying execution issues and coordinating corrective actions to maintain compliance with approved specifications.
- Monitored project costs, material requirements, and delivery risks while supporting the timely completion of construction milestones.
- Liaised with project managers, engineers, and commercial teams to resolve technical and operational constraints affecting project delivery.

Contract Administration & Variations

BOQ Quantity Take-Offs & Estimation

Project Coordination & Delivery

Technical Documentation & Reporting

Stakeholder and Contractor Management

Civil & Railway Infrastructure

Deutsche Bahn Standards

Supplier Relationship Management (SRM Systems)

MS Office

PROJECTS

Germany

Supported railway delivery activities aligned with Deutsche Bahn (DB) standards

- Conventional Refurbishment: Dergenthin Slab Track, Leipzig Leutzsch Station Works
- Assembly Line Technology Implementation: BR Vetschau-Cottbus, GoS Cadenberge-Cuxhaven Railway Section

Qatar

Supported construction project delivery, site coordination, and commercial monitoring activities across large-scale projects in Qatar

- Al Mana Edition Hotel – West Bay: Cost control, commercial monitoring, and project coordination activities
- Viva Bahriya Precinct VB20 & VB21 – The Pearl Qatar: Site supervision, inspections, and construction coordination works

EXPERIENCE

Cost Control Engineer

Ramco Trading & Contracting Co. W.L.L

- 📅 03/2017 - 12/2019 📍 Doha, Qatar
- Managed cost control, budget tracking, and commercial reporting for major construction projects in Qatar.
 - Prepared quantity of take-offs, BOQs, cost estimates, and technical-commercial evaluations for project tenders.
 - Controlled payment certifications, variations, subcontractor claims, and cost reconciliation against contractual budgets.
 - Coordinated procurement, suppliers, and subcontractors to secure materials, control costs, and support uninterrupted site delivery.
 - Identified cost risks, budget deviations, and optimization opportunities, providing management with accurate financial forecasts.
 - Maintained commercial records and contract documentation to support compliance, claims management, and project decision-making.

Site Engineer

Ramco Trading & Contracting Co. W.L.L

- 📅 04/2015 - 02/2017 📍 Doha, Qatar
- Supervised civil and architectural works across major building projects, ensuring compliance with approved drawings, specifications, and quality standards.
 - Coordinated daily site activities, subcontractors, consultants, and multidisciplinary teams to maintain progress and resolve execution issues.
 - Managed inspections, material approvals, RFIs, and technical submittals while driving timely closure of site observations.
 - Monitored workmanship, safety compliance, and construction progress against programme requirements.
 - Prepared progress reports, as-built drawings, and project records to support handover and contract compliance.

ADDITIONAL EXPERIENCE & CERTIFICATIONS

Qatari Light Vehicle

UPDA Grade A Engineer Certificate Details

Date of Issue: October 2024. Description: Certified Grade A Civil Engineer authorized to practice engineering and project supervision in Qatar. Demonstrates advanced competency in civil design, project management, and regulatory compliance

Industrial Trainee

Arup Deutschland GmbH | Düsseldorf, Germany | Jan 2023 - Jul 2023

Civil Engineering Intern

Consolidated Contractors Company (CCC) | Doha, Qatar | Jun 2012 - Aug 2012

EDUCATION

Master of Science in Transport Engineering and Mobility: Railway Systems Engineering

RWTH Aachen University

- 📍 Aachen
- Focused on railway systems engineering, sustainable transport, and infrastructure management aligned with European mobility standards

Master of Science In Construction Project Management

The University of Manchester

- 📍 Manchester
- Specialized in project planning, cost management, stakeholder coordination, and construction project delivery

Bachelor of Science in Civil Engineering

Qatar University

- 📍 Doha
- Built a strong foundation in structural engineering, transport infrastructure, and construction systems
