CORE COMPETENCIES

- Project Management & Leadership
- Highway & Transportation Engineering
- Construction Supervision & Quality Control
- Contract Administration & Management
- Technical Documentation & Reporting
- Budget Development & Cost Control
- Stakeholder Communication & Coordination
- Risk Assessment & Mitigation
- Civil Infrastructure Design Review
- Building Code & Regulatory Compliance

EDUCATION

- **Master of Technology (Highway Technology & Transportation Engineering**), Singhania University, India, 2023
- **Master of Business Administration (Project Management),**Alagappa University, Tamil Nadu, India, 2012
- **Bachelor of Technology (Civil Engineering),**Kakatiya University, India, 1997

Professional Development:

- **Project, Program & Portfolio Management,** Indian Institute of Management, Bangalore

MEMBERSHIPS

- Project Management Professional (PMP), PMI-USA (Registration No: 3152411)
- Member of Construction Management Association of America (CMAA), USA
- MMUP Certified (Grade-A), Qatar
- Chartered Engineer from the Institute of Engineers, India
- Member of the Indian Institute of Bridge Engineers (IIBE), India
- Successfully delivered fast-track Highways/Expressways and High-Rise Building projects for

SUMMARY

Accomplished professional with over two decades of diverse experience in civil engineering, specializing in highway, transportation, and infrastructure projects across Qatar, Saudi Arabia, West Indies, and India. Proven expertise in project management, construction supervision, quality control, and contract administration. Demonstrated success in delivering complex projects on time and within budget, including major health infrastructure and expressway developments. Skilled in stakeholder coordination, risk mitigation, and regulatory compliance. Equipped with advanced technical proficiency, leadership in managing cross-functional teams, and a robust track record in achieving operational excellence and client satisfaction. Highly skilled in civil engineering design reviews, construction quality control, and adherence to ISO standards and local regulations. Expertise spans across managing complex infrastructure projects, including high-rise buildings, highways, and expressways, ensuring compliance with stringent industry benchmarks.

PROFESSIONAL HISTORY

Organisation	Designation	Duration
Roads & Buildings Department, Government of Telangana, India	Deputy Executive Engineer (Roads & Buildings)	April 2025 - Till Date
	Assistant Executive Engineer (Roads & Buildings)	Jan 2021 – March 2025
Parsons International Limited, Qatar	Assistant Resident Engineer(Roads)	Dec 2015 - Jan 2021
Roads & Buildings Department, Government of Telangana, India	Assistant Executive Engineer (Roads & Buildings)	Jun 2014 – Dec 2015
Parsons International Limited, Qatar	Highway Inspector	Nov 2011 - May 2014

Overall Responsibilities:

- Supervising construction of roads and bridges in accordance with specifications, BOQ, and drawings
- Attending progress meetings, addressing land acquisition challenges, and ensuring fulfillment of stakeholder requirements outlined in the project scope
- Reviewing and approving contractor's Interim Payment Certificates (IPCs) while monitoring work progress against the project schedule
- Preparing working estimates based on project needs and recommending them for approval to senior management
- Developing master schedules for all projects—including detailed resource plans, execution strategies, milestone targets, and cash flow projections—and tracking performance through periodic reviews
- Leading full project lifecycle activities from concept creation, design finalization, budgeting, costing, and planning to execution control, quality assurance, and timely project delivery
- Forging strong partnerships with key stakeholders and acting as a strategic advisor to influence decision-making processes
- Collaborating with architects, consultants, and vendors to drive design development and ensure project alignment with overall objectives.
- Directing management of manpower, materials, billing operations, and quantity surveying; ensuring system compliance and verifying statutory land documents for approvals and successful handovers
- Supervising planning, resource estimation, scope control, effort allocation, and adherence to ES&H (Environmental, Safety & Health) standards and regulatory requirements
- Delivering operational, financial, and managerial leadership for seamless execution and successful implementation of project activities

esteemed clients

- Ensuring that all quality benchmarks are met, with project works executed as per IFC (Issued For Construction) drawings, specifications, standards, and codes
- Liaising with various internal departments to obtain essential approvals and permissions necessary for high-rise building construction
- Negotiating and communicating effectively with vendors and contractors, incorporating feedback into design changes, and validating technical specifications from vendor quotes
- Championing project activities by integrating detailed vendor project plans with master schedules, assessing lead times, and managing change request approvals

PREVIOUS EXPERIENCE

- Roads & Buildings Department, Government of Andhra Pradesh, India as Assistant Executive Engineer(R&B) | Jan 2009 – Nov 2011
- SNC Lavalin- Span Consultants, India as Assistant Highway Engineer | Aug 2007 – Dec 2008
- SGT-Universal Projects Ltd., West Indies as ConstructionEngineer | Jan 2007 – June 2007
- Renardet Consultants, India as Assistant Material Engineer | Dec 2005 – Jan 2007
- Abdul Hamid A Al Mutawa Sons Co., Saudi Arabia as QCEngineer | Nov 2004 – Sep 2005
- Span Consultants Pvt. Ltd., India as FieldEngineer(Highways) | Oct 2003 – Oct 2004
- Louis Berger International, India as Engineer (Roads &Bridges) | Mar 2002 – June 2003
- IJM-Gayathri Projects Limited, India as Highway Engineer | Apr 2000 – March 2002
- Siddartha Civil Works Pvt. Ltd., India as HighwayEngineer | Apr 1998 – Jan 2000
- I&V Constructions, India as Bridge Engineer | Feb 1997 – Feb 1998

PROJECTS

Parsons International Ltd., Qatar
Project: Dukhan Expressway Project, Phase-I East Contract
Client: ASHGHAL (Public Works Authority, Qatar) | Duration: Dec 2015 – Jan 2021

- Delivered vital engineering support by leading site construction monitoring, reviewing contract administration processes, and assisting the Resident Engineer in day-to-day project control.
- Oversaw highway project elements, maintained quality standards, and ensured contractor compliance with project specifications.

Roads & Buildings Department, Government of Telangana, India
Project: Scrutiny of Road Estimates and Land Acquisition Support for Highways
Client: Government of Telangana | Duration: Jan 2021 – Jun 2022

- Handled technical scrutiny of road estimates submitted by field engineers, conducted detailed rate analyses, and sanctioned project estimates according to administrative and financial norms.
- Facilitated consultant and contractor shortlisting processes for national highway works and monitored land acquisition activities, ensuring timely handover for infrastructure development.

Roads & Buildings Department, Government of Telangana, India
Project: Construction of Super Speciality Hospital Building (B+G+23 Floors) at Warangal (Warangal Health City Project)
Client: Government of Telangana (Contractor: Larsen & Toubro Limited)
Duration: Jul 2022 –March 2025

- Delivering construction supervision services by managing the execution of a major health infrastructure project.
- Monitoring contractor compliance with approved method statements, quality assurance plans, and inspection protocols.
- Reviewing and approving shop drawings, interim payment certificates, and project schedules to ensure alignment with milestones.
- Providing technical support across all engineering disciplines and ensuring strict adherence to client policies, safety standards, and documentation requirements.
